We collect photographs of bugs from the United States and Canada for identification and research. We summarize our findings in guide pages for each order, family, genus, and species. Making New Discoveries More than just a clearinghouse for information, this site helps expand on the natural histories of our subjects.

Welcome to BugGuide.Net! - BugGuide.Net

Freshwater fish ID guides/keys Fish are identified by both their common name and a scientific (or Latin) name. The use of scientific names is encouraged because each one is unique to a single species. Common names can be confusing because they may change from place to place and/or refer to a number of fish species.
