### Handbook Of Ipv4 To Ipv6

Versions 10.11 and up will prioritize IPv6 Traffic in spec with Happy Eyeballs. MeeGo: 1.2 No: Yes: No Yes: NetBSD: 7.0 Yes Yes Yes Yes OpenBSD: 6.6 Yes Yes Addon: Yes RDNSS is only supported for rad(8) so far. As of 6.6, OpenBSD still does not favor IPv6 connectivity if there is IPv4 connectivity. [citation needed] openSUSE: 42.1 (Leap) Yes: Yes

### Comparison of IPv6 support in operating systems - Wikipedia

It may support IPv4 or IPv6. OSI Layer 3 PPVPN architectures. This section discusses the main architectures for PPVPNs, one where the PE disambiguates duplicate addresses in a single routing instance, and the other, virtual router, in which the PE contains a virtual router instance per VPN. The former approach, and its variants, have gained the ...

### Virtual private network - Wikipedia

The number of addresses of a subnet defined by the mask or prefix can be calculated as 2 address size - mask, in which the address size for IPv6 is 128 and 32 for IPv4. For example, in IPv4, a mask of /29 gives: 2 32-29 = 2 3 = 8 addresses.
