There are 6 possible outcomes that are doubles, so the probability of doubles is $\frac{6}{36} = \frac{1}{6}$. (b) The conditioning event (sum is 4 or less) consists of the 6 outcomes

(1;1);(1;2);(1;3);(2;1);

(2;2);(3;1); 2 of which

are doubles, so the

conditional probability

$\frac{2}{6} = \frac{1}{3}$. Inference Bain
